To begin, I ask students to think back to our Classifying Living Things lesson, where they grouped organisms in a variety of ways. I explain that today, they are classifying specific kinds of animals. Vocabulary Preview. I direct students' attention to the words vertebrate and invertebrate written on the board and ask: What do you think these words mean?

The two parvorders, baleen whales (Mysticeti) and toothed whales (Odontoceti), are thought to have diverged around thirty-four million years ago. Baleen whales have bristles made of keratin instead of teeth. The bristles filter krill and other small invertebrates from seawater. Grey whales feed on bottom-dwelling mollusks. Rorqual family (balaenopterids) use throat pleats to expand their mouths ...

Animal languages are forms of non-human animal communication that show similarities to human language. Animals communicate by using a variety of signs such as sounds or movements. Such signing may be considered complex enough to be called a form of language if the inventory of signs is large, the signs are relatively arbitrary, and the animals seem to produce them with a degree of volition (as ...
