differences between plutonic and volcanic rocks are more complex and more revealing of the geological evolution of the earth. Thus, a representative plutonic rock would be granite, while representative in turn of volcanic rock would be basalt. Besides the difference between the large crystals of the former and the microscopic crystals of the latter, they contrast markedly in color.

### **PHYSICAL SETTING EARTH SCIENCE - Regents Examinations**

Intrusive vs Extrusive Rocks The key difference between intrusive and extrusive rocks is that the intrusive rocks are formed from magma whereas the extrusive rocks are formed from lava.

### **Difference Between Intrusive and Extrusive Rocks ...**

There are three types of rocks-igneous, metamorphic, and sedimentary. Each rock is formed through different processes and made up of varying materials. Igneous rocks are formed through the cooling of melted materials while metamorphic rocks are formed when heat and pressure change other rocks. Sedimentary rocks are composed of pieces of rocks and minerals and even remains of animals and plants ...

Frozen Mammoths. Fleshy remains of about 50 elephant-like animals called mammoths, and a few rhinoceroses, have been found frozen and buried in Siberia and Alaska. One mammoth still had identifiable food in its mouth and digestive tract. To reproduce this result, one would have to suddenly push a well-fed elephant (dead or alive) into a very large freezer that had somehow been precooled to ...
