The history of hydraulic systems can be traced back to the 1646, when Braise Pascal performed the first hydrostatic experiment. He used a Pascal's barrel to investigate the effect of a force applied at one point of the fluid and how it is transmitted to the other sections within an enclosed system. The outcome of his experiments resulted in a scientific law/principle called Pascal Law or ...

Overload resolution happens compile-time. So when we have == between generic types T and T, the best overload is found, given what constraints are carried by T (there's a special rule that it will never box a value-type for this (which would give a meaningless result), hence there must be some constraint guaranteeing it's a reference type). In your Follow Up 2, if you come in with DerivedTest ...

Property, in the abstract, is what belongs to or with something, whether as an attribute or as a

component of said thing. In the context of this article, it is one or more components (rather than attributes), whether physical or incorporeal, of a person's estate; or so belonging to, as in being owned by, a person or jointly a group of people or a legal entity like a corporation or even a society.
