Newton's law of universal gravitation states that every particle attracts every other particle in the universe with a force which is directly proportional to the product of their masses and inversely proportional to the square of the distance between their centers. This is a general physical law derived from empirical observations by what Isaac Newton called inductive reasoning.

(2005-07-15) The Lorentz Force The Lorentz force on a test particle defines the electromagnetic field(s).. The expression of the Lorentz force introduced here defines dynamically the fields which are governed by Maxwell's equations, as presented further down. Neither of these two statements is a logical consequence of the other.
