How to solve different types of Algebra Word Problems?, Age problems, average problems, coin problems, Integer problems, digit problems, distance problems, fraction problems, geometry word problems, interest problems, lever problems, mixture problems, Motion word problems, ratio problems, work problems, examples with step by step solutions, Algebra calculator

### **How to solve Algebra Word Problems? (solutions, examples ...**

Purplemath. Solving proportions is simply a matter of stating the ratios as fractions, setting the two fractions equal to each other, cross-multiplying, and solving the resulting equation. The exercise set will probably start out by asking for the solutions to straightforward simple proportions, but they might use the "odds" notation, something like this:
