The family Columbidae was introduced by the English zoologist William Elford Leach in a guide to the contents of the British Museum published in 1820. Columbidae is the only living family in the order Columbiformes. The sandgrouses (Pteroclididae) were formerly placed here, but were moved to a separate order Pteroclidiformes based on anatomical differences (e.g., they are unable to drink by ...

Sampling and analysis or visual examination of soil to assess its status and use potential is widely practiced from plot to national scales. However, the choice of relevant soil attributes and interpretation of measurements are not straightforward, because of the complexity and site-specificity of soils, legacy effects of previous land use, and trade-offs between ecosystem services.
