I've noticed with docker that I need to understand what's happening inside a container or what files exist in there. One example is downloading images from the docker index - you don't have a clue what the image contains so it's impossible to start the application.

### **linux - Exploring Docker container's file system - Stack ...**

The final argument for God's existence views God as a cosmic watchmaker who set the world into motion in such a way that life could emerge. Professor Johnson lays out this theory and explores some of its many challenges, including the idea that the universe is not all that fine-tuned and that there may be more than one way to build a universe.
