The use of antibiotics is one of many important tools in the treatment of human and animal disease. Preserving their effectiveness, both in humans and animals, is a responsibility we take seriously and work continuously with animal health companies, our farmers and our veterinarians to determine when an antibiotic is really needed.

Intensive farming involves various types of agriculture with higher levels of input and output per cubic unit of agricultural land area. It is characterized by a low fallow ratio, higher use of inputs such as capital and labour, and higher crop yields per cubic unit land area. This contrasts with traditional agriculture, in which the inputs per unit land are lower.
