Stars and Galaxies Answer Key - eduplace.com

The stars are evenly distributed through the galaxy. The center is crowded with stars, and the number of stars decreases farther out. Most stars are near the outside of the elliptical galaxy, with dust clouds in the center. The stars are spread through out the galaxy in bands that look like the arms of spiral galaxies.

the nebula ... • Just as stars are grouped together within galaxies, galaxies are grouped into clusters.

Chapter: Stars and Galaxies - Hanover Area School District

Stars and Galaxies - glencoe.com

Stars and Galaxies - glencoe.com

Galaxies are defined based on their appearance. The Milky Way is a particular type of galaxy known as a spiral galaxy. Other types include an irregular galaxy, an elliptical galaxy, and a quasar. It is estimated that about 33% of existing galaxies are large, rounded groupings of stars. There is little gas in these galaxies so new stars are not forming.
