Animal Behavior AP Lab 11 Introduction: Ethology is the study of animal behavior. This involves observing an organism's behaviors, interpreting what is observed, and research different organisms. Ethologists study and observe an organism's reaction to the environment around them. Biotic and abiotic factors are limiting factors that control the maximum size of ...

### **Lab 11 Animal Behavior - BIOLOGY JUNCTION**

Lab 11 Animal Behavior Introduction: Ethology is the study of animal behavior. An animal's behavior is its response to sensory input. There are three types of behaviors: orientation, agonistic, and mating. Orientation behaviors take the animal to its most favorable environment. Taxis is when an animal moves toward or away from a stimulus.
