It has unfortunately happened to all of us. No matter how experienced of an angler you are, every once in a while we all have a fish that gets hooked in the gill. Immediately we remove the hook and hope this doesn't cause the fish any harm and that it doesn't bleed. Fish bleeding tends to be a worst-case scenario for an angler and we thought we could answer a few questions about the best ...

What is a paddlefish, and where are they found? Paddlefish represent an ancient lineage of fish most closely related to sturgeons. There are only two species of paddlefish in the world; an extremely endangered (possibly extinct) species found in China, and our North American species, currently found in 22 states throughout the Missouri and Mississippi river basins.
