Free online factoring calculator that factors an algebraic expression. Enter a polynomial, or even just a number, to see its factors. Signup for detailed step-by-step solutions.

**Factoring Calculator - Free Math Help**

To check the factoring keep in mind that factoring changes the form but not the value of an expression. If the answer is correct, it must be true that . Multiply to see that this is true. A second check is also necessary for factoring - we must be sure that the expression has been completely factored. In other words, "Did we remove all common ...

This page will try to solve a quadratic equation by factoring it first. How does this work? Well, suppose you have a quadratic equation that can be factored, like  $x^2 + 5x + 6 = 0$ . This can be factored into  $(x+2)(x+3) = 0$ . So the solutions must be  $x = -2$  and  $x = -3$ . Note that if your quadratic equation cannot be factored, then this method will not work.
