Explore the "POP" in popcorn - Scientific American

Popcorn itself is very healthy but if you slather it in butter, salt or sugar, it’s going to do some damage. The same could be said for broccoli or any other innocent vegetable. Consuming bucket-

loads of popcorn like those found in movie theaters is also a bad idea. A reasonable portion size is one or two cups.

Is Eating Popcorn Bad For You? A Fact-Checked Analysis ...

Percentage of Water in Popcorn Lab Stamps Introduction - Popcorn pops because of the natural moisture inside each kernel. When the internal water is heated above 100°C, the liquid water changes to a gas, which takes up much more space than the liquid, so the kernel expands rapidly. The popping process works best when the kernels are first

Experiments with Popcorn. Popcorn is a food that has been around for many thousands of years, ever since people in America discovered that if corn (maize) was left next to a fire, it would 'pop' into fluffy and delicious shapes. Ever since then, popcorn has become one of the most popular foods on earth, with movie-goers everywhere tucking...
