Thermostat placement in a greenhouse: To get the desired temperature, thermostats should be located at plant height near the center of the greenhouse where they are not influenced by drafts or sidewall cooling. It is best if both heating and cooling thermostats are located together and protected from direct contact with sunlight and water.

Back to Microwave Oven Repair FAQ Table of Contents. Testing and Replacement of Components. Please see Typical Microwave Oven Electronics Bay for parts identification. Testing the oven - the water heating test The precise number of degrees a known quantity of water increases in temperature for a known time and power level is a very accurate test of the actual useful microwave power.

Notes on the Troubleshooting and Repair of Microwave Ovens

Putting anything in or over vents to reduce noise transmission is going to reduce air flow through the ducts. Generally speaking "soft" things absorb sound so a carpeted room will be "quieter" than one with hardwood flooring but there really isn't a "cheap" solution.
