For all coding exercises, review the documentation and underline key term(s). Identify the terms used to look up the code selection in the Alphabetic Index. Assign CPT codes to the following cases. If applicable, append CPT/HCPCS Level II modifiers. In some cases, the student will be prompted to answer questions about the case study.

### **Answer Key - Introduction to Clinical Coding**

A reference range is a set of values that includes upper and lower limits of a lab test based on a group of otherwise healthy people. By comparing your test results with reference values, you and your healthcare provider can see if any of your test results fall outside the range of expected values and gain clues to help identify possible conditions or diseases.
