The POST is one among the http methods like GET, HEAD etc., Few basics regarding the the HTTP itself. It is a text based protocol (You can connect to port 80 of the server using a telnet client like putty and type the whole request by hand).

POST HTTP request to login with username and password with ...

Subset is a very slow function , and I personally find it useless. I assume you have a data.frame, array, matrix called Mat with A, B, C as column names; then all you need to do is:. In the case of one condition on one column, lets say column A

r - Select rows of a matrix that meet a condition - Stack ...

Distributed computing is a field of computer science that studies distributed systems. A distributed system is a system whose components are located on different networked computers, which communicate and coordinate their actions by passing messages to one another. The components interact with one another in order to achieve a common goal. Three significant characteristics of distributed ...
