It is always better to prevent a disease than to treat it after it occurs. Diseases that used to be common in this country and around the world, including polio, measles, diphtheria, pertussis (whooping cough), rubella (German measles), mumps, tetanus, rotavirus and Haemophilus influenzae type b (Hib) can now be prevented by vaccination. Thanks to a vaccine, one of the most terrible diseases ...

What Are Emotions – Feelings? Different people define emotions in different ways. Some make a distinction between emotions and feelings saying that a feeling is the response part of the emotion and that an emotion includes the situation or experience, the interpretation, the perception, and the response or feeling related to the experience of a particular situation.
