ATTENTION! ATTENTION! ATTENTION! Please be aware: the Escambia Civics benchmark sites are no longer available. The Escambia Civics review site was designed as a partnership with FJCC and we have worked with them to design the new and very much improved Civics 360 website. It is free and available at Civics 360 and includes updated videos and readings.

In mathematics and computing, the method of complements is a technique to encode a symmetric range of positive and negative integers in a way that they can use the same algorithm (hardware) for addition throughout the whole range. For a given number of places half of the possible representations of numbers encode the positive numbers, the other half represents their respective additive inverses.

Method of complements - Wikipedia

In physics, spacetime is any mathematical model that fuses the three dimensions of space and the one dimension of time into a single four-dimensional continuum. Spacetime diagrams can be used to visualize relativistic effects such as why different observers perceive where and when events occur differently.. Until the turn of the 20th century, the assumption had been that the three-dimensional ...
