Curiosity is the raw ingredient of knowledge. It causes us to ask questions, to seek answers, to learn. At Northern Michigan University, natural curiosity and intellectual challenge meet in stimulating classes grounded in the liberal arts.

University Bulletin | NMU Bulletin

R f values are calculated by looking at the distance each component travels on the chromatography paper compared to the distance traveled by the solvent front. This ratio will be different for each component due to its unique chemical properties. When measuring the distance the component traveled, you should measure from the origin (where the middle of the spot originally was) and then to the ...
