xkcd: Earth Orbital Diagram

Perhaps you're familiar with the idea of inertia: an object in motion tends to stay in motion (unless acted upon by a net external force). In a way, we can also refer to this idea as conservation of momentum. That idea's going to play a big part in answering your question. When the helicopter starts ...

Transform Boundaries Places where plates slide past each other are called transform boundaries. Since the plates on either side of a transform boundary are merely sliding past each other and not tearing or crunching each other, transform boundaries lack the spectacular features found at convergent and divergent boundaries.

Access to scripts such as the Book of Enoch, the Nag Hamadi Gospels, the Book of Jubilees, among other historical texts help to broaden our knowledge base relative to the writings in the Canonical Bible; many of these documents predate the Canonical Bible by thousands of years, shedding light on the origins and influences of the familiar stories told therein having an immense influence on ...

Mankind's Forbidden History Holds the Answer for the ...

Break It Down Erosion is the process that breaks things down. As far as we're concerned, erosion is the breakdown of the continents and the land around you. The overall effect of breaking down and weathering the land is called denudation. Denudation is the process of erosion.

Geography4Kids.com: Biosphere: Erosion

Paul Andersen explains how matter and energy are conserved within the Earth's system. Matter is a closed system and Energy is open to the surroundings.

AP ES-002 Environmental Systems — bozemanscience

Water is constantly being cycled between the atmosphere, the ocean and land. This cycling is a very important process that helps sustain life on Earth. As the water evaporates, vapors rise and condense into clouds. The clouds move over the land, and precipitation falls in the form of rain, ice or snow.

The Water Cycle
