What does caffeine do to cause the reaction time to increase? Question Date: 2005-05-13: Answer 1: The simple answer is that caffeine stimulates the production of adrenaline, which is a hormone often called "the fight or flight hormone".

UCSB Science Line

Let's say I cloned a repository and started modifying files. I know that if I have local uncommitted changes, I can do a diff as follows `git diff test.txt` and it will show me the difference between the current local HEAD and the modified, uncommitted changes in the file. If I commit those changes I can diff it against the original repository by using `git diff master origin/master`
