In nuclear chemistry, nuclear fusion is a reaction in which two or more atomic nuclei are combined to form one or more different atomic nuclei and subatomic particles (neutrons or protons). The difference in mass between the reactants and products is manifested as either the release or absorption of energy. This difference in mass arises due to the difference in atomic "binding energy" between ...

+1 for A Collection key (or index position for that matter) is only good for reading, not writing. Brushing off some very rusty VBA for a project and this was key (ha!) - replacing the entire item with a new object did the trick. In my case, this meant a new array filled with values from the existing array + changes.
