ANSWER KEY Series and Parallel Circuits In a series circuit electricity has only one path to follow. All parts are connected one after another. Electrons flow from the negative side of the battery around in a loop to the positive

Series and Parallel Circuits - SuperTeacherWorksheets

There are two types of electrical circuit: series and parallel. In series circuits, the components are connected in one loop. The current that flows through all the components is the same. The diagram below shows a series circuit, where two bulbs are connected in series. If one breaks, the other one will not light, because there is only one loop.
