Answer Pregnancy Test Results Faint

Best Answer: It is possible that you had a chemical pregnancy. Where you got pregnant, but had an early miscarriage. You should wait a little longer for your period, and then test again if it doesn't come. It could take a while for HCG levels to go down if this is what occurred.

Took Pregnancy Test and got faint positive results, then ...

With some home pregnancy tests, one line means the test is negative and you're not pregnant, and two lines mean the test is positive and you are pregnant. A faint positive line in the results window, on the other hand, can leave you scratching your head. A faint positive line isn't uncommon and there are a few possible explanations.

Faint Positive Pregnancy Test: Are You Pregnant?

If there's a faint line, there's only a small amount of hCG in your urine, usually because it's early in the pregnancy. Some pregnancy tests are more sensitive to hCG than others. A more sensitive pregnancy test might turn clearly positive even if a low amount of the hormone is present, while a less sensitive test taken at that same time might show a faintly positive result.

My home pregnancy test showed a faint line. Am I pregnant ...

A faint line when you've tested early could mean you are pregnant. Testing up to 7 days after the first day of your missed period is generally considered early. Pregnancy tests detect the pregnancy hormone hCG, which increases rapidly each day during the first 13 weeks of pregnancy.

Faint Pregnancy Test Line is Very Light - Am I Pregnant or ...

A faint line on a pregnancy test is telling you hCG has been detected. This almost certainly means you're pregnant. Most women prefer to be absolutely certain, though, and really want to see a much darker line on their pregnancy test.

Faint Line On A Pregnancy Test - What Does It Mean ...

A faint positive pregnancy test is when the line that appears on the pregnancy test is very faint. This is an indication that there isn't enough hCG in your urine for the pregnancy test to trigger a positive pregnancy result. Every pregnancy test has a rated sensitivity rating measured in mIU/L. The lower this number the more sensitive it is.

Very Faint Positive Pregnancy Test: Does This Mean I'm ...

At home pregnancy tests work by detecting HCG hormone levels in your urine. HCG starts being produced the moment you become pregnant and steadily increases throughout your pregnancy. The more in your system the bolder the line on the pregnancy test should be. All About the Faint Line on a Pregnancy Test

Faint Line on a Pregnancy Test...What does it Mean ...

If you saw a faint test on your pregnancy test, here is what you should do. 1. Wait A Few Days And Test Again. Because some pregnancy tests require higher hCG levels than others, it might not be picking up enough of the hormone to cause a dark line just yet. If in a few days you are still seeing a faint line it might be a good idea to call your doctor.

What a Faint Line Pregnancy Test Actually Means

If you see a faint line on your first response pregnancy test, then it is very likely you are pregnant as this line indicates there is hCG in your urine. Go ahead and schedule an appointment with your doctor to confirm your exciting news.

I Have a First Response Pregnancy Test Faint Line. Am I ...

Although a faint line on a pregnancy test can be considered a positive result, sometimes it can be caused by an evaporation line, which leads to a false result. In most cases, if you are pregnant, you will see a dark, unmistakable result.

Faint Line On Pregnancy Test

The only product on the market that can detect pregnancy up to FIVE days before the first day of your missed period (assuming you have a perfectly on-time cycle every time) is First Response. Even then, the accuracy of the test on the first day (or before) is only about 85-90%. If you do the test a week after, the accuracy goes up to 95-97%.

Pregnancy test with very faint result? | Yahoo Answers

The reason you would see a faint line on a pregnancy test is that the hcg level is probably very close to the sensitivity threshold of the test. For example, if you dip a pregnancy test that is sensitive to 20 mIU/ml hcg in a sample of urine containing precisely 20 mIU/ml hcg, the test manufacturer is expecting this test to yield a positive result, albeit very likely a faint one.

Faint Line Pregnancy Test

Mmm A faint positive means you are just about pregnant. When I fell pregnant mine was really faint, but the doctors said negative. I was sure that I was, so I left it another couple weeks (adding with no period!) and did it again and it was bold lines!! Have you missed a period etc?

5 Faint Possitives Pregnancy Tests? | Yahoo Answers

With this pregnancy (I am now 19 weeks) I used 2 First Reponse tests 2 and 4 days before my missed period and the lines were faint. Then the day of my expected period and 2 days after I used the digital Clear Blue Easy tests and they both read positive. So if you've gotten 2 faint positives then wait until your period is due and take a digital ...

Pregnancy test results (faint lines)? | Yahoo Answers

Most of the home made pregnancy tests that comes with an outcome of a faint positive line it refers to the fact that you are indeed expecting. Most women who take a home test will complain of the fact that most of the times a faint positive line comes up which is distinct but leaves them confused.

Faint Positive Pregnancy Test - Am I Pregnant ...

If you get a negative result on a home pregnancy test after having gotten a positive result, this could be an understandable cause for concern and confusion. While it is may simply be a false negative (usually as a result of a user error), it could also be the result of a very early miscarriage, known as a chemical pregnancy.

Interpreting Faint Lines on a Pregnancy Test - Verywell Family

Best Answer: Generally speaking, any sign of a line - even if it is faint - is a positive. Get another test, go to sleep and wait until the morning to take it. hcg levels are higher when you first wake up. The first one I took was VERY faint.
