This course is designed to provide an overview on epidemiology and the Internet for medical and health related students around the world based on the concept of Global Health Network University and Hypertext Comic Books.

Supercourse: Epidemiology, the Internet, and Global Health

A reference range is a set of values that includes upper and lower limits of a lab test based on a group of otherwise healthy people. By comparing your test results with reference values, you and your healthcare provider can see if any of your test results fall outside the range of expected values and gain clues to help identify possible conditions or diseases.

Reference Ranges and What They Mean | Lab Tests Online

IUI is a simple method of treatment. It works well in some cases, but may not be the right solution for many types of infertility situations. In best of cases, the success rates are typically 15% per

cycle of treatment and about 50% for couples who attempt over 2-3 cycles.
