Nuclear movement in muscle involves the usual suspects. Forces on the nucleus must be generated to induce movement which is achieved by motor proteins that bind to the cytoskeleton and either push or pull the nucleus. Certain nuclear migrations require the Linker of Nucleoskeleton and Cytoskeleton (LINC) complex although the full extent of the complex's role in all the 5 types of nuclear ...

Nuclear positioning in skeletal muscle - ScienceDirect

A kick-off meeting was held in August 2014. Step 1 was at the ASTRO meeting 2014: an overview of RC structure sets was made. In Table 1 provides an overview of the subsites defined in the available RC delineation guidelines. Details on their individual boundaries can be found in the Supplementary material. In December 2014, seven rectal cancer cases were selected (Step 2).

I'm trying to perform the colony formation assay (or clonogenic assay) with a cancer cell line to study the effect of DNA repair inhibitors on the cytotoxicity of chemotherapeutic drugs.

Colony formation assay - ResearchGate

Smallpox was an infectious disease caused by one of two virus variants, Variola major and Variola minor. The last naturally occurring case was diagnosed in October 1977 and the World Health Organization (WHO) certified the global eradication of the disease in 1980. The risk of death following contracting the disease was about 30%, with higher rates among babies.

Discredited theories Smallpox vaccination theory. In 1987 there was some consideration given to the possibility that the "AIDS epidemic may have been triggered by the mass vaccination campaign which eradicated smallpox".An article in The Times suggested this, quoting an unnamed "adviser to WHO" with "I believe the smallpox vaccine theory is the explanation to the explosion of AIDS".
