Answer Key To Periodically Puzzling

I think it's almost entirely about reducing the volume of support queries they get. I suppose you could also argue that since you have to enter your password over HTTPS anyway to access the website, you can't be increasing security by using a different authentication mechanism (SSH keys), but feasibly you're increasing the attack surface which might decrease security.

Why does GitHub recommend HTTPS over SSH? - Stack Overflow

I have a Excel 2010 workbook that is shared by other users who periodically update various cells. Is there a shortcut key, like F5 with most web browsers, that updates the document with any change...
