Summary. A little over 50 years ago, Sydney Brenner had the foresight to develop the nematode (round worm) *Caenorhabditis elegans* as a genetic model for understanding questions of developmental biology and neurobiology. Over time, research on *C. elegans* has expanded to explore a wealth of diverse areas in modern biology including studies of the basic functions and interactions of eukaryotic ...

The eureka effect (also known as the Aha! moment or eureka moment) refers to the common human experience of suddenly understanding a previously incomprehensible problem or concept. Some research describes the Aha! effect (also known as insight or epiphany) as a memory advantage, but conflicting results exist as to where exactly it occurs in the brain, and it is difficult to predict under what ...

The first structural information on the immune checkpoint proteins became available in 1997 with the publication of the nuclear magnetic resonance (NMR) structure of human CTLA-4 (PDB: 1AH1), a receptor related to PD-1 in its function (Metzler et al., 1997). Since then, several structures of other immune checkpoint proteins were reported, but it took almost 7 years to solve and publish the ...
