### **Physiology - Online USMLE Prep Course - Lecturio**

Your circulatory system consists of your heart, blood vessels and blood, and is responsible for transporting life-giving oxygen throughout your body. When you exercise, your body's need for oxygen increases; the harder you work out, the more oxygen your body demands. To ensure that sufficient oxygen ...

### **The Effects of Exercises on the Circulatory System ...**

Goblet cells make more than mucin. They make a crosslinking molecule called TFF3 for a mucin structural barrier. It is, also, a signaling molecule helping to repair breaks in epithelium, to aid the migration of epithelial cells up the villi and to contribute to the defense against endothelial cell death.

### **The Very Intelligent Intestine Epithelial Cell**

Pearson, as an active contributor to the biology learning community, is pleased to provide free access to the Classic edition of The Biology Place to all educators and their students.
