From their very first day in school, students should be actively engaged in learning to view the world scientifically. That means encouraging them to ask questions about nature and to seek answers, collect things, count and measure things, make qualitative observations, organize collections and observations, discuss findings, etc. Getting into the spirit of science and liking science are what ...

@Martin: I understand the distinction but I think a physical primary key (i.e. the one you define in the DB) should be immutable. The primary key of the conceptual data model should have the attributes given in the answers from the link you provided but may be different from the final physical primary key (familiarity for example is not IMO a criteria for the primary key of the actual table).

Why a Scientific Format? The scientific format may seem confusing for the beginning science writer

due to its rigid structure which is so different from writing in the humanities. One reason for using this format is that it is a means of efficiently communicating scientific findings to the broad community of scientists in a uniform manner.

A race is a grouping of humans based on shared physical or social qualities into categories generally viewed as distinct by society. First used to refer to speakers of a common language and then to denote national affiliations, by the 17th century the term race began to refer to physical (phenotypical) traits. Modern scholarship regards race as a social construct, an identity which is assigned ...
