USA.Life Is the Answer to Facebook Censoring Christians ...

I have an associative array in the form key => value where key is a numerical value, however it is not a sequential numerical value. The key is actually an ID number and the value is a count. This is fine for most instances, however I want a function that gets the human-readable name of the array and uses that for the key, without changing the value.

In PHP, how do you change the key of an array element ...

A sheriff in the Hudson River Valley near Albany, New York, about to go into the hills in the fall of 1839 to collect back rents from tenants on the enormous Rensselaer estate, was handed a letter:
