Answer Key Evidence For Evolution

Evidence of common descent of living organisms has been discovered by scientists researching in a variety of disciplines over many decades, demonstrating that all life on Earth comes from a single ancestor. This forms an important part of the evidence on which evolutionary theory rests, demonstrates that evolution does occur, and illustrates the processes that created Earth's biodiversity.

Evidence, broadly construed, is anything presented in support of an assertion. This support may be strong or weak. The strongest type of evidence is that which provides direct proof of the truth of an assertion. At the other extreme is evidence that is merely consistent with an assertion but does not rule out other, contradictory assertions, as in circumstantial evidence.

Evolution is a scientific theory used by biologists. It explains how living things change over a long time, and how they have come to be the way they are.. Earth is very old. By studying the layers of rock, we can find out about its past. That kind of research is called historical geology.. We know that living things have changed over time, because we can see their remains in the rocks.
