The term alternative text, as used in this article, refers to the text equivalent for an image, regardless of where that text resides. It does not refer solely to the alt attribute of the image tag. Alt attribute will be used when referring to the attribute itself, which often will, but does not exclusively, contain the alternative text.

The fadeIn() and fadeOut() functions will also change the CSS "display" property, meaning that fadeOut() will set "display: none" after the element is completely faded out and fadeIn() will first restore the "display" property to its original value before fading the element back in.. In contrast, when using fadeTo(), only the CSS "opacity" property will be changed.
