Temperature is another important variable. The above properties were measured at room temperatures. As temperatures increase up to the limit of 1,063°F (573°C) mentioned in Endnote 81, the piezoelectric coefficient increases and breakdown voltages decrease—both contributing to more extensive and powerful plasma production.. 81.

In nuclear chemistry, nuclear fusion is a reaction in which two or more atomic nuclei are combined to form one or more different atomic nuclei and subatomic particles (neutrons or protons). The difference in mass between the reactants and products is manifested as either the release or absorption of energy. This difference in mass arises due to the difference in atomic "binding energy" between ...

Frozen Mammoths. Fleishy remains of about 50 elephant-like animals called mammoths, and a few rhinoceroses, have been found frozen and buried in Siberia and Alaska. One mammoth still had identifiable food in its mouth and digestive tract. To reproduce this result, one would have to suddenly push a well-fed elephant (dead or alive) into a very large freezer that had somehow been precooled to ...
