What Is a Map? Just like your house key opens your front door, a map key or legend opens up a map. The map key is what gives you all the information you need for a map to make sense.

What is a Map Key/Legend? - Definition, Symbols & Examples
In the context of relational databases, a foreign key is a field (or collection of fields) in one table that uniquely identifies a row of another table or the same table. In simpler words, the foreign key is defined in a second table, but it refers to the primary key or a unique key in the first table. For example, a table called Employees has a primary key called employee_id.

Foreign key - Wikipedia
Definition: Key result areas or KRAs refer to the general metrics or parameters which the organisation has fixed for a specific role. The term outlines the scope of the job profile, and captures almost 80%-8% of a work role. Description: Key result areas (KRAs) broadly define the job profile for the ...
